# CSCI-432 Client-side Development

Create an app named **app13** that satisfies the requirements below.

The app is due Friday, March 31.

---

## Visuals & Code

- The app's home view should display 6 components in the pattern depicted in the photograph shown below.

- There must be padding between the outside viewport and the div that contains the app.

- Each component should be stylized differently so the viewer can discern the different components. The components need not display the roman numerals shown below.

- The components <u>must be</u> laid out using CSS grid properties.
