

CSCI-432 Client-side Development

Create a new app named **app8**. The app should display a Create Account page.

The app is due Wednesday, February 15.

Visuals

- The create component form should have the following input fields with the following constraints.
 - Username (min - 4 chars)
 - Password (min 8 chars, 1 punctuation, 1 lowercase, 1 uppercase)
 - Repeat Password
 - Email address (valid email address format)
 - Phone number (valid area code and phone number format)
 - Profile Image (optional for the users)
- The slideshow should be stylized to provide a pleasing visual experience.
- If the user uploads a profile image, the app should render the image in the form.

Code

- The component should utilize template refs.
 - The component should utilize watchers.
 - The component should utilize lifecycle hooks.
 - I recommend you find an [npm module](#) to validate the email and phone instead of writing it yourself.
-
